

[Juni-Update KB4503276 Blockt PXE-Boot Bei SCCM DPs](#)

The screenshot shows the Configuration Manager Console interface. At the top, there's a menu bar with "File", "Action", "View", "Window", and "Help". Below the menu bar is a toolbar with navigation icons. The main area is titled "Software Updates" and shows a filtered view of 3 items out of 877. A search bar contains "2416472" and "All Columns" is selected. Below this is a table of updates. The third row is selected and highlighted in blue, with a green box around the "Yes" in the "Downloaded" column. Below the table are tabs for "Update Details", "Deployment Status", "Content Information", "Supersedence Information", and "Custom Bundle Information". The "Content Information" tab is active, showing a table with columns: "Content ID", "Downloaded", "Language", "Source Path", and "Size (Mb)". The first row has "33381" in the "Content ID" column (boxed in blue) and "No" in the "Downloaded" column (boxed in red). The second row has "31684" in the "Content ID" column (boxed in blue) and "Yes" in the "Downloaded" column (boxed in red). The third row has "31683" in the "Content ID" column (boxed in blue) and "Yes" in the "Downloaded" column (boxed in red).
